

QUESTIONS AND ANSWERS CONTRACT 999 ANIMAL CAGING SYSTEM

Is there any way to get a drawing of the kennel lay out? That would be really helpful. Thanks in advance.

Answer – Floor plan will be available at site walk thru

John and Robert,

I wanted to follow up with your request for bid regarding the Town of Vernon Animal Shelter's kennels. I see the written specifications but I don't see any panel sizes called out. I know the bid is for 14 runs but they are asking for 28 gates. I assume there will be a gate on the front and back of each run. The 14 required dog doors then confuse me on where they will be needed. I also assume there are 14 isolation side panels required but they don't say how long these are to be. Any drawings or floor plan showing the kennel lay out would be very helpful in quoting you on this project. Thanks for your help.

Answer – Floor plan will be available at site walk thru, layout will be explained as well

John and Robert,

I received your bid today for the 14 kennel runs.
Are you accepting any alternative products for the bid? We do not manufacture chain link and our side panels are not FRP material. We do use anodized aluminum framing on our gates and panels.
I have attached some informational material, drawing of our product and some pictures. Thank you
